

RESTRICTIONS ON DENOMINAL VERB FORMATION

Andrew Lee Zupon

(Edward Rubin)

Department of Linguistics

Denominal Verbs

- Verbs formed from noun roots
 - John **shelved** the books.
 - Hank **saddled** the horse.
- Spectrum/Hierarchy
 - Innovative → Opaque
 - She **Houdini'd** her way out of the closet.
 - The protesters **boycotted** the company.
- Restrictions
 - #Rachel **desked** the papers
- Why is this important?

Outline

- Hale and Keyser's system of lexical argument structure
- Clark and Clark's analysis of denominal verbs
- Conventional and conversational implicatures
- Denominal verb proposal

Lexical Argument Structures

- System of structural relations
- Projected from the lexicon to the syntax
- Noun incorporation
- Subject to syntactic principles

Lexical Argument Structures

“She put her books on the shelf.”

Lexical Argument Structures

“She shelved her books.”

Lexical Argument Structures

- Benefits to this analysis
 - Follows syntactic principles and restrictions
 - Helps explain certain restrictions like *#house the paint* (meaning provide a house with a coat of paint)

Lexical Argument Structure

- Problems with this analysis
 - Doesn't explain the *shelve/#desk* pair

- Impossible words aren't blocked (Fodor and Lepore 1999)
 - *#to cow* would be considered an acceptable verb.

Clark and Clark (1979)

- World Knowledge & Mutual Knowledge
 - *The boy porched the newspaper.*
- Restrictions on denominal verb formation
 - Specificity
 - Suppletion
 - Homonymy
 - Synonymy
 - Ancestry
 - Entrenchment
- Informal analysis; no formal pragmatics

Implicature

- Conventional Implicature
 - A. *Even Ken knows it's unethical.*
 - A'. *Ken is the least likely to know it's unethical.*
 - Non-cancellable
 - *#Even Ken knows it's unethical, but that's not surprising.*
 - Detachable
 - *Ken knows it's unethical (too).*

Implicature

- Conversational Implicature
 - B. *Jones dresses well and writes grammatical English.*
[in a recommendation letter for a philosophy position]
 - B'. *Jones is no good at philosophy.*
 - Cancellable
 - *but I don't mean to suggest that...*
 - Non-detachable
 - Expressing the same literal meaning in the same context would create the same inference.
 - Context-dependent

Proposal

- Denominal verbs create conventional implicatures.
- Solves the *shelve/#desk* problem from Hale & Keyser.
- Formalizes Clark & Clark's analysis of restrictions and world knowledge.

Proposal

- *Shelve* has a convention associated with it.
 - Shelving books has the convention of arranging them vertically in rows, perhaps in order.
 - *Shelve* is an acceptable denominal verb.
- *Desk* does not have a convention.
 - There is no convention for placing items on a desk that warrants the use of *desk* as a denominal verb.
 - *Desk* is not a valid denominal verb.

Examples

- (1)
 - a. *Marianne shelved the books.*
 - a' *Marianne put the books on the shelf vertically, in rows.*
 - b. *#Marianne shelved the books, but they're in random piles.*
 - c. *Marianne put the books on the shelf.*

- (2)
 - a. *Orson saddled the horse.*
 - a'. *Orson put the saddle on the horse, and strapped it on with the intention of riding it.*
 - b. *#Orson saddled the horse, but only by laying it on the horse's back, temporarily.*
 - c. *Orson put a saddle on the horse.*

- (3)
 - a. *Arthur speared the lion.*
 - a'. *Arthur used the spear to impale the lion with the spearhead.*
 - b. *#Arthur speared the lion, but by hitting it over the head.*
 - c. *Arthur used a spear against the lion.*

Where are we now?

- We have a way of describing the observed restrictions on denominal verbs using a standard system of pragmatics.
- My proposal addresses the problems with Hale and Keyser's system and formalizes Clark and Clark's ideas.
